## NMEA Buffer NBF-3

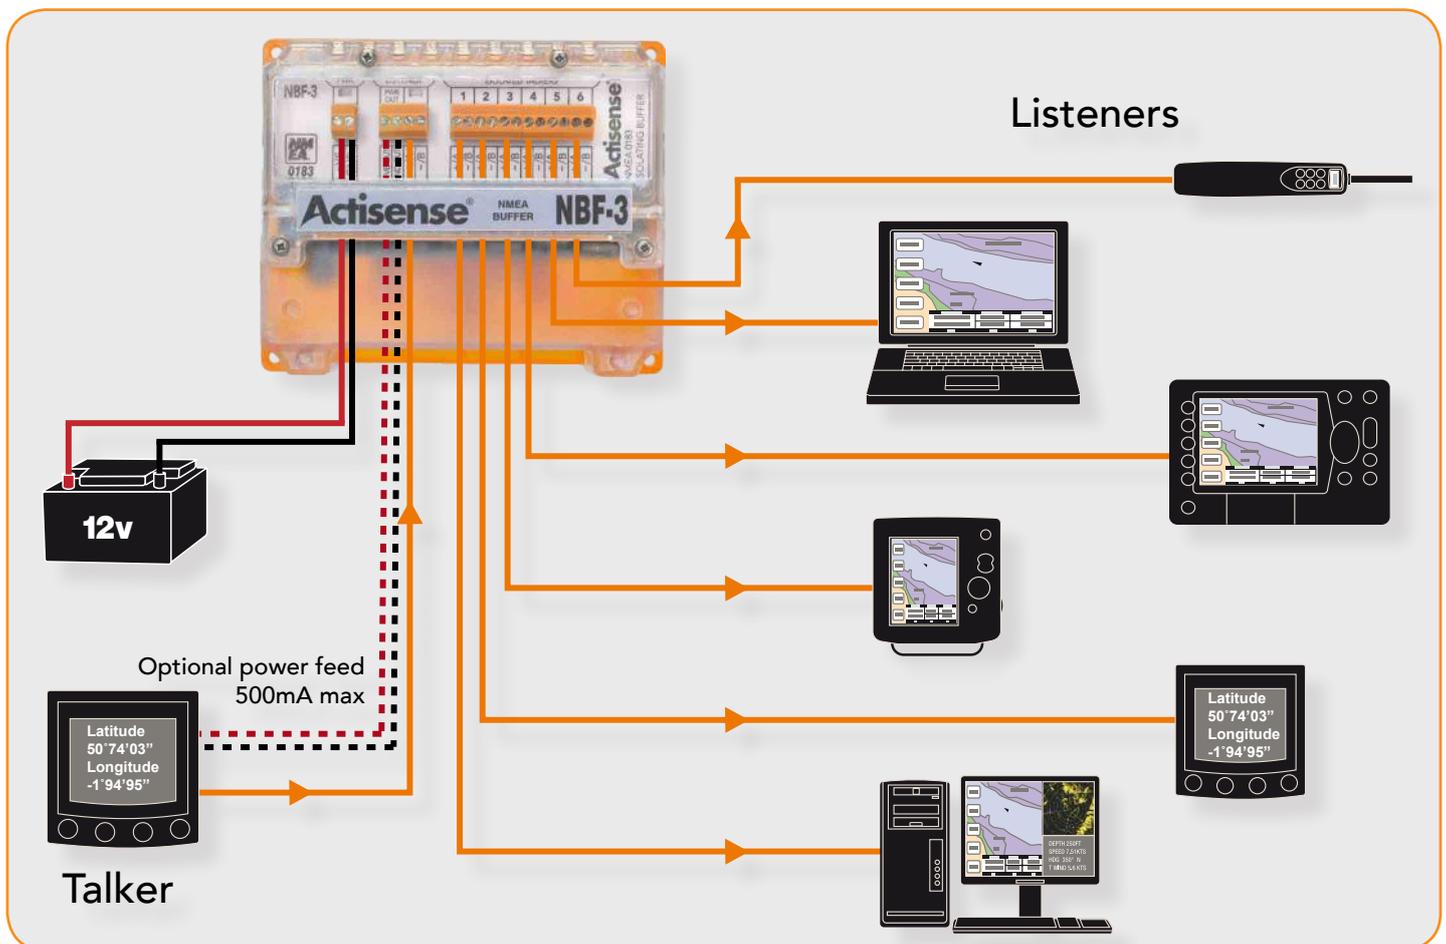

The NBF-3 offers the best solution for driving multiple NMEA<sup>®</sup> 0183 devices. Isolation on the input and each output allows non isolated devices to be connected safely.

Designed with a diagnostic LED on the input, pluggable connectors for quick and easy installation and a specially designed case with DIN rail option.

The addition of power distribution for NMEA Talker allows a single cable to connect power and data to the Talker.
